CASCADIA™ 72 INCH RAISED ROOF  
CAB CONFIGURATION

## 72" RAISED ROOF SLEEPER CAB

Passenger side refrigerator cabinet has shelf large enough for a 24" flat screen TV.

The distinctive diamond stitch of Cascadia's premium black cloth interior, large bunk and mid-level refrigerator cabinet offer all the comforts of home.

### A Spacious Home and Office on the Road

The Cascadia 72 inch Raised Roof SleeperCab is a smart choice for your business and your lifestyle. Built to be efficient, productive and profitable, the Cascadia will allow you to achieve professional and personal success by helping keep drivers happy and on the road. Larger than most sleeper cabs, the Cascadia is 75 inches wide and 85 inches tall over the seats, providing a well-appointed working and living environment designed to enhance the driving experience and increase productivity. With enough headroom and elbow room for any operator, the Cascadia is not only comfortable and efficient; it's the smartest solution to keep your business and life moving forward.

By recognizing the value and profit potential of keeping the driver comfortable both on the road and off, the Cascadia is more than a freight-hauling machine. It is a tool for significant lifestyle advances. Available with a standard interior appointed with cloth or vinyl and black mats, the Cascadia can also be spec'd with a premium interior featuring additional padding, diamond tufted upholstery and color coordinated carpeting. Because there are no painted interior surfaces, hard trim is color molded for long lasting wear and appearance, enhancing resale value.

The appliance center and floor cooler are two of five cabinet options available in the Cascadia 72 inch SleeperCab. (Others shown)

## SLEEPERCAB FEATURES

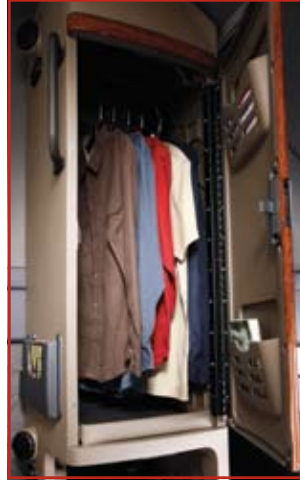

The large, wide seats are easily adjusted for comfort to fit all sizes of drivers and passengers.

Cascadia interior illumination increases convenience and safety.

Large baggage doors make it easy to load and unload gear.

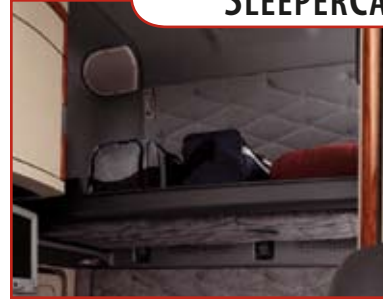

The wardrobe cabinet features make it easy to get clothing articles you need.

Easy to operate AM/FM/WB/CB radios are available as options.

New, state of the art HVAC system increases airflow 20 percent more than typical systems.

The above bunk shelf is a convenient option in the Cascadia 72 inch SleeperCab.

Four power outlets allow access to shore power and the optional Xantrex power inverter/charger system.

Back of cab HVAC control console, features a reading light, power outlet and digital alarm clock.

### Standard Features That Make A Difference

The Cascadia 72 inch Raised Roof SleeperCab features modular cabinets, closets and shelves, so you can keep your gear, clothing and comfort items stowed, organized and secure. Attractive and strong cabinets are designed to be rattle-free for a quiet ride. Belt level cooler and refrigerator options allow easy access to food items. Closet doors feature several smaller pockets and storage areas to keep magazines, paper work and such within reach, but out of your way. An above bunk shelf can be ordered as an option, replacing the upper bunk for additional storage space.

Cascadia also provides one of the best illumination packages in the industry. Lights strategically located for business, pleasure and safety are standard. Other features, such as a spacious under bunk storage area and a large baggage compartment with optional RH or LH doors make it easy to pack the gear you need. In addition to a powerful HVAC system, the cab and sleeper are wrapped in noise and thermal insulation for an extremely quiet environment that stays warmer in the winter and cooler in summer. Four AC power outlets allow access to shore power and the optional Xantrex power inverter/charger system to power available.

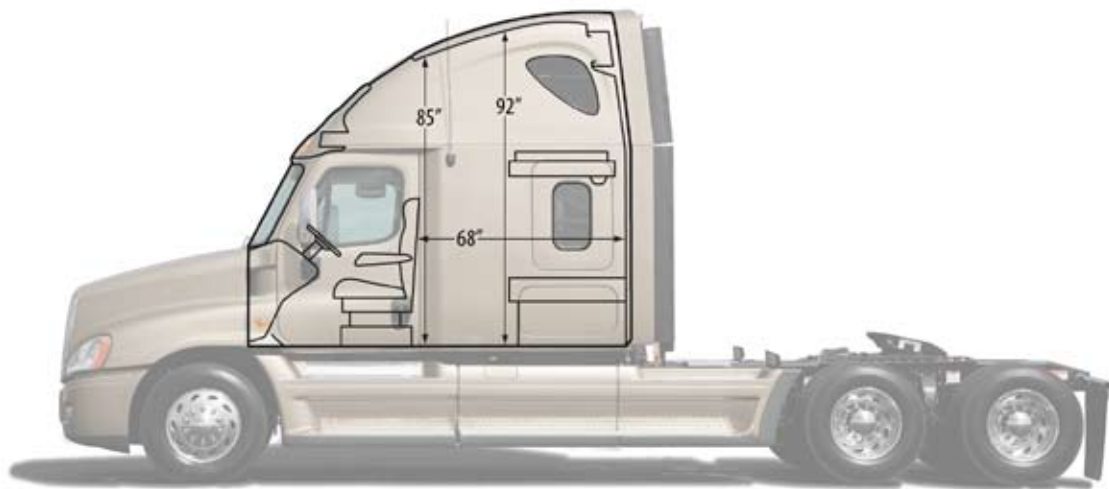

Under bunk storage has removable partitions to keep your gear organized and tidy.
